

POWER HARROWS

HIGH STRENGTH STEEL

All Alpego machines use the best steel to reduce weight and increase work performance, this maximizing both consumption and operating costs. This has a great impact on environmental sustainability as well.

**WE HAVE
CREATED A
COMPLETE
SYSTEM
BECAUSE
HAVING
THE BEST
STEEL
IS NOT
ENOUGH.**

The sticker "ALPEGO INSIDE" on all machines, certifies the high quality of Alpego's products. An union of first quality materials, eco-sustainable coating process and certified welding that guarantees an exceptional durability and quality over the years.

ECO PAINTING

A unique system of its kind throughout Europe, which allows each component to be painted with the most suitable process and in full respect for the environment. The paints used, in fact, are water-based and powder-based and do not produce emissions of VOC (Volatile Organic Compounds).

CERTIFIED WELDING

For more than twenty years the exceptional durability of Alpego structural components has been guaranteed by the effectiveness of welds made by highly qualified personnel in accordance with standardized processes certified by the National Welding Institute.

A complete range for all needs

Three types of mechanics for a complete range up to 8 meters wide

Rotary power harrows have been for many years the most flexible professional machines for soil cultivation thanks to their ability to adjust to all types of soils and situations. Moreover, their possibility to be combined with a seed drill represents a further advantageous solution even in the seed-drilling process.

SFERA

The ball-bearing mechanics is mounted on a wide range of power harrows, up to 6 meter wide and it offers excellent structural performances. The machines equipped with this kind of solution are ideal for the preparation of the seedbed.

STANDARD POWER HARROW
Ballbearing

TWIN FORCE K

The patented Twin Force K, used in the professional models is ideal for deep soil cultivation and combined machines. The machines equipped with this type of mechanics are suited to be used with high-power tractors.

TWIN-FORCE "K"
Standard power harrow + 60 mm

TWIN FORCE MAX

The patented solution Twin-Force MAX, used in the top-of-the-range professional models further improves the structural features and yields the utmost reliability in the use of very high power tractors of up to 500 HP.

TWIN-FORCE "MAX"
Standard power harrow + 100 mm

The power harrows with ball-bearing mechanics manufactured by Alpego guarantee high performances on models of limited weight for tractors of up to 270 HP.

The features of these mechanics are:

- 1) shaft with a surface treatment
- 2) dual inline ball bearings
- 3) upper ball bearing is on axis with the geared
- 4) upper grease nipple to insure lubrication
- 5) the rotor support is screwed on
- 6) guard against foreign bodies is supplied standard
- 7) half-rock guards mounted on a plate
- 8) maze-shaped dust protection

The entire structure is crewed on from the top, which makes future maintenance procedures easier.

PRESENT ON THE FOLLOWING MODELS:

BF

DJDJ

DP

ROTOR TIMING SEQUENCE:

All the supports of the tines mounted on the power harrows we manufacture follow a very precise sequence. This prevents vibrations of the transmission organs with the resulting decrease of the absorbed power.

TYPES OF TINES:

The right tine for every need. The experience of many years in the field has led Alpego to develop a wide range of tines suited for the most varied uses. The special shape and angle of inclination guarantee an excellent crumbling with a decreased amount of power absorption.

AVAILABLE TINES:

STANDARD LAMINATED TINE

QUICK-REPLACEMENT LAMINATED TINE

HALF-ROCK GUARDS

The half-rock guards not only protect the rotors from wear and tear, they also improve the crumbling degree of the soil and the work quality.

TWIN FORCE K

Fast and powerful

The patented Twin-force K system consists of 2 rotors held together by a single support for double strength. It presents Timken self-lubricating tapered roller bearings which, combined with carburised gears, guarantee the utmost reliability of the transmission. The power harrow thus equipped makes it possible to reach exceptional performances in terms of:

- Increased working depth
- Higher forward speed
- Utmost exploitation of the available tractor power
- Highest reliability and minimum maintenance

TWIN FORCE MAX

Incredibly efficient

The top-of-the range machines are equipped with the patented Twin-Force MAX mechanics. This solution enhances the features of the "K", thanks to a better lubrication, a sturdier structure and an increased free span. The power harrow thus equipped makes it possible to reach exceptional performances in terms of:

- Increased working depth
- Higher working capacity
- Use under extremely difficult conditions
- Highest reliability
- Minimum maintenance
- Designed and developed to exploit tractors of very high power

DMAX

Alpego gearboxes

Entirely designed
in Alpego

KS GEARBOX

Gearbox 540 or 100 rpm designed and developed in the Alpego premises according to Alpego specs. The switching or the replacement of the gear pair makes it possible to change the number of revolutions of the rotors and this, in turn, makes it possible to optimize the work of the power harrow depending on the type of soil, on the forward speed and on the degree of required crumbling.

CS GEARBOX

1000 rpm gearbox designed and developed according to Alpego specs. The switching or the replacement of the gear pair makes it possible to change the number of revolutions of the rotors with a wide range up to 500 rpm without risking to damage the gearbox itself. The bevel gear with helical teeth guarantees the utmost efficiency and sturdiness of the system up to 500 HP. The large surface of the components guarantees a remarkable thermal dissipation.

GEAR SWITCHING

By switching or replacing the gear pair it is possible to obtain several different rpm of the rotors. This makes it possible to optimize the work of the power harrow depending on the type of soil, on the forward speed and on the degree of required crumbling.

SELF-LUBRICATION

Because the outer casings of the large-dimension bevel gears are enveloping them, these are able to perform a very important self-lubrication, while cooling all internal components at the same time. Thanks to this solution the Alpego power harrows do not need any further cooling systems.

ALPEGO LUBRICANTS

Alpego has always invested in research and development of lubricants with specific characteristics for the use in own machines. Thanks to these features, power harrows benefit from a longer life and optimal functioning of mechanical components.

The advantages of our power harrows

Details that make a difference

FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM

With the PARALLELOGRAM system for the adjustment of the working depth the rear roller maintains a constant angle of inclination, therefore:

- the levelling bar remains always adjusted
- in the combination with a seed-drill the seed-drilling coulters maintain a constant pressure.

LEVELLING BAR ATTACHED TO THE REAR ROLLER

This solution improves the crumbling quality while decreasing the power absorption. When changing the working depth of the power harrow the levelling bar and the rear roller maintain a constant levelling of the soil. Moreover, at the end of the field it is possible to level the residual soil, thereby avoiding unpleasant accumulations.

SET OF QUICK REPLACEMENT OF THE TINES

Simple, safe and fast operation without the need for any tool. A set of the quick replacement tines can be supplied separately as an alternative to the traditional system, or it can be mounted directly by the manufacturer and it represents a further protection for the tine-supporting plate.

OSCILLATING FRAMES

The 2 folding sections can follow the unevenness of the soil thanks to a floating system (excursion of 20° upwards or downwards) or be rigid.

Foldable power harrow
for tractors up to 220 HP
and working width up to 5m

The folding power harrow ROTODENT DJ is made of high strength steel, offering high structural performances while light in weight. It is available in the working widths 360, 400, 460 SUPER and 500 Super. It is ideal for tractors from 90 to 220 HP.

Foldable power harrow
for tractors up to 270 HP
and working width up to 6m

The folding power harrow ROTODENT DP, made of high strength steel is available in the working widths 4, 5 and 6 mt. and it is ideal for tractors from 120 to 270 HP.

1 BALL-BEARING MECHANICS

The ball-bearing mechanics is used in a wide range of power harrows of up to 6 meters and it guarantees very good structural performances for tractors of up to 270 HP. Equipped standard with front guards which prevent stones from entering and damaging the rotors. The models equipped with this solution are ideal for the preparatio of the seedbed.

2 FOLDING WITH AUTOMATIC LOCKING

Automatic hydraulic unlocking during the unfolding of the machine.

3 OSCILLATING 3-POINT HITCH

Oscillating hitching unit to the tractor for a better adjustment to the soil even under highly bumpy conditions.

4 LEVELLING BAR MOUNTED ON THE ROLLER

It is mounted on the rear roller, thus improving the levelling and crumbling quality and decreasing the power absorption.

5 EQUIPMENT

Oscillating 3-point hitch to the tractor of 2nd. and 3rd. category/ Gearbox 1000 rpm/ universal joint with shear-bolt safety or automatic clutch/ Rear lights supplied standard/ Central track eraser.

1 BALL-BEARING MECHANICS

The ball-bearing mechanics is used in a wide range of power harrows of up to 6 meters and it guarantees very good structural performances for tractors of up to 270 HP. Equipped standard with front guards which prevent stones from entering and damaging the rotors. The models equipped with this solution are ideal for the preparatio of the seedbed.

2 FRAME MADE OF HIGH-TENSILE STEEL FOR COMBINATION WITH A SEED-DRILL

The steel structure supports heavy loads.

3 HALF-ROCK GUARDS SUPPLIED STANDARD

The half-rock guards not only protect the rotors against wear and tear, they also improve the crumbling of the soil and the work quality.

4 FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM

The rear roller maintains a constant angle of inclination when the working depth is changed.

5 EQUIPMENT

3-point hitch to the tractor of 2nd. and 3rd. category/ Gearbox 1000 rpm/ Universal joint with shear-bolt safety or automatic clutch/ Rear lights supplied standard/ Central track eraser.

DKTOP

Foldable power harrow
for tractors up to 350 HP
and working width up to 6m

The ROTODENT DK TOP is a professional folding power harrow thanks to its TWIN-FORCE tine support with tapered roller bearings is particularly suited in combination with seed drills and it is available in the working widths 4, 4.5, 5 and 6 mt. It is ideal for tractors from 130 to 350 HP.

1 TWIN-FORCE K MECHANICS

The patented Twin-Force K mechanics, used in the professional models is ideal for the deepest cultivation and in combined machines. The machines equipped with this solution are suited to be hitched to high power tractors.

2 FLOATING LATERAL FRAMES

The 2 folding sections can follow the unevenness of the soil thanks to a floating system (excursion of 20° upwards or downwards) or be rigid.

3 LEVELLING BAR MOUNTED ON THE ROLLER

It is mounted on the rear roller, thus improving the levelling and crumbling quality and decreasing the power absorption.

4 FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM

The rear roller maintains a constant angle of inclination when the working depth is changed.

5 NEW 3-POINT HITCHES OF 3/4TH. CATEGORY

In order to make our power harrows compatible with high-power tractors, we have developed 3-point hitches of 3/4th. cat.

6 NEW LATERAL FRAMES

The new DK-TOP features new shaped lateral plates with wearproof skids. The new design fosters the best flow of the soil toward the rear rollers.

7 NEW STONE GUARDS

In order to prevent stones from penetrating between the rotors, we have developed even more efficient stone guards.

8 HIGH-RESISTANCE STEEL STRUCTURE

Frame made of high quality steel to ensure maximum resistance.

9 EQUIPMENT

3-point hitch to the tractor of 3rd. and 4th. category/ Gearbox 1000 rpm/ Universal joint with shear-bolt safety or automatic clutch/ Rear lights supplied standard with wiring/ Central track eraser.

DMAX

Foldable power harrow
for tractors up to 500 HP
and working width up to 8m

The ROTODENT DmaX is a folding
power harrow unique in its category.
Its strong point is the TWIN-FORCE
"MAX" mechanical peculiarity and its
heavy-duty structure. It is available in
the working widths 4.5 and 5, 6, 7 and
8 m. for tractors from 180 to 500 HP.

1 TWIN FORCE MAX MECHANICS

The patented solution Twin-Force MAX, used in the top-of-the-range professional models further improves the structural features and yields the utmost reliability in the use of very high power tractors of up to 500 HP.

2 FLOATING LATERAL FRAMES

The 2 folding sections can follow the unevenness of the soil thanks to a floating system (excursion of 20° upwards or downwards) or be rigid.

3 FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM

The rear roller maintains a constant angle of inclination when the working depth is changed.

4 LEVELLING BAR MOUNTED ON THE ROLLER

It is mounted on the rear roller, thus improving the levelling and crumbling quality and decreasing the power absorption.

5 COMBINATION WITH SEED-DRILL UP TO 8 METERS

The high load capacity of the frame permits the Dmax power harrows to be combined with seed-drills and other types of implements.

6 A.I. GUARD

The AI-GUARD, belonging to the AI package, foresees the monitoring of several parameters of the machine. From the monitor it is possible to check the temperature of the mechanical transmissions and the number of revolutions of said transmissions. Visual/acoustic alarms warn when the critical levels are exceeded. Moreover, the system gives advices concerning programmed maintenance operations.

7 CS GEARBOX

1000 rpm gearbox developed according to Alpego specs. The switching or the replacement of the gear pair makes it possible to change the number of revolutions of the rotors from 200 to 500 rpm. The bevel gear with helical teeth guarantees the utmost efficiency of the system up to 500 HP. The large surface of the components guarantees a remarkable thermal dissipation.

8 LATERAL UNIVERSAL JOINTS

Walterscheid lateral universal joints with an automatic clutch supplied standard. In the 700 and 800 models they are suitably larger.

9 EQUIPMENT

Rigid and oscillating 3-point hitch to the tractor of 3rd. and 4th. cat. and of 4th.N rigid USA category/ Dual-speed lateral gearboxes 1000 rpm/ Rear lights supplied standard/ Forged tines/ Central track eraser

Rigid power harrow
for tractors up to 120 HP
and working width up to 2m

The strong and compact rigid power harrow ROTODENT BD2 is available in the working widths 1.6, 1.8 and 2.05 m. It is ideal for tractors from 45 to 120 HP.

Rigid power harrow
for tractors up to 120 HP
and working width up to 3m

The strong, multi-purpose rigid power harrow ROTODENT BE is available in the working widths 2.5 and 3 m.; for tractors from 65 to 120 HP.

Weight with Cage roller (Kg)	1450	1595	1805
Weight with Spiral roller (Kg)	1470	1640	1855
Weight with Spike roller (Kg)	1495	1645	1830
Weight with Trapeze roller (Kg)	1895	2075	2295
Weight with Otico roller (Kg)	1715	-	2125

N.B.: the weight includes the universal joint with an automatic clutch

1 TWIN-FORCE K MECHANICS

The patented Twin-Force K mechanics, used in the professional models is ideal for the deepest cultivation and in combined machines. The machines equipped with this solution are suited to be hitched to high power tractors.

2 STONE GUARDS

The stone guards prevent stones from getting jammed between the rotors and damaging them.

3 FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM WITH LEVELLING BAR

The rear roller maintains a constant angle of inclination when the working depth is changed.

4 FRAME MADE OF HIGH-TENSILE STEEL FOR COMBINATION WITH A SEED-DRILL

The steel structure supports heavy loads.

5 EQUIPMENT

Oscillating 3-point hitch to tractor of 3rd. cat./ Gearbox 1000 rpm/ Universal joint with shear-bolt safety or automatic clutch.

Rigid power harrow
for tractors up to 320 HP
and working width up to 4m

The ROTODENT RmaX is a rigid power harrow unique in its category. Its strong point is the TWIN-FORCE "MAX" mechanical peculiarity and its heavy-duty structure. It is available in the working widths 3, 3.5 and 4 m. for tractors from 120 to 320 HP.

	RMAX-300	RMAX-350	RMAX-400
Working width (mm)	2940	3410	4030
Transport width (mm)	3000	3500	4000
Tractor power (HP)	120-320	130-320	140-320
Working depth (mm)	300	300	300
Rotors (n°)	12	14	16
Tines (n°)	12+12	14+14	16+16
Weight with Packer roller (Kg)	1910	2140	2325
Weight with Cage roller (Kg)	1655	1860	2100
Weight with Spiral roller (Kg)	1685	1905	2150
Weight with Spike roller (Kg)	1700	1910	2125
Weight with Trapeze roller (Kg)	2025	2270	2590
Weight with Otico roller (Kg)	1890	-	2420

N.B.: the weight includes the universal joint with an automatic clutch

1 TWIN FORCE MAX MECHANICS

The patented solution Twin-Force MAX, used in the top-of-the-range professional models further improves the structural features and yields the utmost reliability in the use of very high power tractors of up to 500 HP.

2 FRAME MADE OF HIGH-TENSILE STEEL FOR COMBINATION WITH A SEED-DRILL

The steel structure supports heavy loads.

3 CS GEARBOX

1000 rpm gearbox developed according to Alpego specs. The number of revolutions of the rotors can be changed from 200 to 500 rpm. Efficiency of this system up to 500 HP. It guarantees a high thermal dispersion.

4 FLOATING REAR ROLLER MOUNTED ON A PARALLELOGRAM

The rear roller maintains a constant angle of inclination when the working depth is changed.

5 EQUIPMENT

Oscillating 3-point hitch to tractor of 3rd. cat./ Gearbox 1000 rpm/ Universal joint with automatic clutch / Levelling bar mounted on the roller.

Which seed-drill for which power harrow?

You only need to choose according to your needs

		<div>BD2</div> 	<div>BF</div> 	<div>RM</div> 	<div>RK</div> 	<div>RmaX</div> 	<div>DP</div> 	<div>DKTOP</div> 	<div>DmaX</div> 
<div>APE</div> 	The pneumatic APE seed-drill has been developed for the distribution of single, granular seeds or grass-mixtures in vineyards and orchards, also for the green-manure technique.								
<div>JET-M</div> 	The JET-M seed-drill focuses on the simplicity of use and on utmost versatility. It can be combined with tractors from 110 to 200 HP.		* only for the FAST version						
<div>JET-X</div> 	Jet-X has been created for professional and intensive agriculture under the most demanding conditions. It can work combined with tractors of up to 320 HP.								
<div>ASPro</div> 	The front hopper Fertidril AsPro with a single metering unit is made entirely of stainless steel and is the versatile solution for seeding or fertilizing the soil.								
<div>ASMax</div> 	The Fertidril ASmaX multifunction hopper with a dual metering unit is completely made of stainless steel and can be used with seed and fertilizer at the same time.								

Choosing the options

The correct option for any situation

TRACK ERASER KIT

HYDRAULIC DEPTH ADJUSTMENT

KIT REAR PTO

HALF-ROCK GUARDS SET

SET OF QUICK-RELEASE TINE FOR THE BALLBEARING RANGE

LEVELLING BAR ADJUSTMENT

HYDRAULIC LINKAGE FOR SEED-DRILL

SET OF FORGED QUICK-RELEASE TINES

SET FOR THE ASSEMBLY OF BROADCAST SEED-DRILL

Accessories and rollers	BD2	BE	BF	RM	RK	RMAX	DJ	DP	DKTOP	DMAX
Track eraser kit										
Half-rock guards set										
Hydraulic linkage for seed-drill										
Hydraulic depth adjustment										
Set of quick-release tine for the ballbearing range										
Set of forged quick-release tines										
Kit rear Pto.										
Levelling bar adjustment										
Set for the assembly of broadcast seed-drill										
Packer roller										
Cage roller										
Spiral roller										
Spike roller										
Otico roller										
Trapeze roller										
Crumb roller										

The choice of the roller

For a perfect soil tillage

PACKER ROLLER

The Packer roller is the versatile roller for excellence. It offers a distribution of weights on the entire surface. With a diameter of 480, 520 or 570 mm, there is a limited risk of jamming even when the soil is sticky or in the presence of crop residues. The packer roller can work both alone and combined, its versatility allows it to work on light, clayey, silty, dry and tenacious soils.

CAGE ROLLER

CAGE roller is the ideal roller for working dry, medium density soils. The roller is equipped with a rod structure that guarantees optimal reconsolidation. (ø 420 mm and 500 mm)

SPIRAL ROLLER

The SPIRAL roller creates a soft and uniform seeding surface and is suitable for medium and light soils. (ø 450 mm e 520 mm)

SPIKE ROLLER

The SPIKE roller is very versatile, it works well even when the soil is damp and compacted. (ø 480 mm e 560 mm)

OTICO ROLLER

This roller is rubber-coated with the ridges spaced 12.5 cm. The roller is intended for light, moist or clay soils, and it compacts the furrow in which the seed will be laid. The rubber-covered surface does not allow the soil to stick, especially in the presence of very tacky and sticky soils, however it is not advisable to use in presence of stones. (ø 500 mm)

TRAPEZE ROLLER

The notched cast-iron roller ridges are spaced 12.5 cm or 15 cm depending on row spacing. With its diameter of 505 mm it combines a perfect rotation and a pressing of the seeding line. Designed for the combination can also work alone. It adapts perfectly to all types of dry or wet soil even in the presence of stones or crop residues.

CRUMB ROLLER

The CRUMB roller is suited for working in brittle soils, even when they are heavy and damp and it guarantees a good crumbling and compactation before seeding. (ø 480 mm)

RIGID POWER HARROWS

40 - 320 HP

FOLDABLE POWER HARROWS

320 - 500 HP

SUBSOILERS

50 - 500 HP

ROTARY CULTIVATORS AND STONE BURIERS

50 - 500 HP

SEED-DRILLS
